Please Note: This summary chart of aftermarket window film information is not a legal document. Window film laws vary from state to state. Before applying any window film materials, installers should thoroughly review the appropriate state regulations as well as local enforcement policies to insure compliance with all applicable legal standards.

NOTES:

1. Law Year: Year that window film rules and laws were instituted in the particular state.
2. Type: Film = Light Transmittance % of film only • Net = Light Transmittance % of film and glass • Vague = Legislative language is unclear
3. Windshield: Presumably, non-regulated (NR)* tinting is permitted above the AS-1 line. If the law specifies only the AS-1 line, AS-1 appears. If AS-1 or specified inches appear, the AS-1 is assumed and only the number of inches down appears.
* NR is used in lieu of "No, Any, or a specific percentage" when the law permits unspecified "non-obstructive" or "transparent" tinting materials. In these cases, the legality of tinting inevitability depends upon each officer's discretion.
4. Front Sides: No film, or the actual percentage of light transmittance permitted. Note: because they may vary from state to state, manufacturer's tolerances (i.e. +/- 3% light transmittance) are not listed on this chart, nor are they included in these light transmittance numbers.
5. Back Sides: No film, or the actual percentage of light transmittance permitted.
6. Rear: No film, or the actual percentage of light transmittance permitted.
7. MPV: Multi Purpose Vehicles, or vehicle used for passengers on a truck chassis. Pick-up trucks are not classified as MPVs.
8. Restricted Colors, All Glass: R = Red • A = Amber • Y = Yellow • N/S = Not Specified
9. Mirrors (Left and Right required outside): Yes or No. Usually, a Yes means that dual outside mirrors are required if the back window is to be tinted.
NR = Non-regulated • NE = Not excessive (not specific) • MBNR = Must be non-reflective (not specific) • MNIR = Must not increase reflectivity
NMMA: No metallic or mirrored appearance • NONE = No reference to reflectivity in the current law
10. Certification Required: Yes or No. Note: this usually refers to a requirement for manufacturers to certify the films they plan to sell before shipping them into the state.
11. Sticker Location: No = No sticker required • Rec = Sticker recommended • Specif = The state requires unique language and design, which may entail precise wording and sizing
Driver = The sticker is required between the film and glass on the driver's side doorjamb
Door = The sticker is required on the inside of the driver's side doorjamb
All = The sticker should be put between the film and glass on each tinted window
12. Medical Exemption: Yes or No. For more details about the specific terms of the exemption, consult your state's legal code.
